

We are looking for a Python software developer (m/f)

#whatwedo

Content Garden Technologies is a 2013 founded technology company with the vision to bring digital advertising to a new age. Native Advertising and Content Marketing is our playground where we are one of the major innovators in digital marketing. We are a young team working with great enthusiasm and dedication to change the digital world and our goal is to develop new advertising opportunities that people will enjoy consuming again.

In order to support our technical team, we are looking for employees to develop our in-house software further.

#whatyoudo

As a software developer you will be required to maintain and develop our software and plan further enhancements with the entire team. Furthermore, you will be responsible for constant quality control.
